SUMMARY

Junior software engineer focused on backend and systems development. I build APIs, databases and systems in C# and .NET, user interfaces in React, and deploy applications to Azure. During my internship as an application technician I worked with installation, configuration and operation of business systems. I am looking for roles in full-stack development, application management, integration and implementation in the Gothenburg area.

TECHNICAL SKILLS

Languages & frameworks: C#, .NET / ASP.NET Core, Python, JavaScript, React, Vite, HTML, CSS
Data, APIs & cloud: SQL Server, Azure SQL, RESTful API design, SignalR, JSON, Microsoft Azure, Azure Static Web Apps, CI/CD
Testing & methods: Unit testing, TDD, System testing (IEEE 829), Agile / Scrum
Tools & AI: Git/GitHub, Visual Studio, VS Code, OpenAI API, Claude Code

EXPERIENCE

Application Technician (Internship) — *Estrella AB, Gothenburg* | *March 2026 – September 2026*

- Installed and configured new software, including InforMES, and ensured stable operation.
- Supported users with technical issues and handled IT incidents.
- Maintained and updated existing systems to improve performance.

Machine Operator — *Estrella, Gothenburg* | *June 2024 – Present*

- Keep production machines running and resolve issues such as alarms. Operate forklifts to transport raw materials.

Warehouse Worker — *DHL, Gothenburg* | *October 2022 – June 2024*

Vehicle Assembler — *Volvo Cars, Torslanda* | *June 2021 – February 2024*

PROJECTS

Job Application Agent – AI agent for job searching | *October 2026 – Present*

- Finding relevant jobs on Platsbanken (the Swedish Public Employment Service job board) takes a lot of manual searching, so I am building an AI agent that does it for me.
- The agent fetches job ads for the Gothenburg area through the JobTech API and uses the Claude API to assess how well each ad matches my resume. The result is a list of the most relevant jobs.
  Tech: C#, .NET 10, Claude API, JobTech API, Azure SQL, React, Vite

MarketPulse – Web application with API | *July 2026*

- Built a web application with a RESTful API in ASP.NET Core, an Azure SQL database and a React front end.
  Tech: C#, ASP.NET Core Web API, Azure SQL, React, Vite

LiFeDenTal – Dental records system | *June 2026 – Present*

- Dental clinics need one system for patient records and appointment booking. I am developing the entire system.
- Built RESTful APIs in ASP.NET Core, an Azure SQL database and a React front end. The result is working records and booking management, deployed on Azure Static Web Apps.
  Tech: C#, ASP.NET Core Web API, SignalR, React, Vite, Azure SQL, Azure Static Web Apps

SmartE-School – Hackathon project | *May 2026*

- During a hackathon, our team built an app that helps primary school students learn more effectively. I was responsible for functionality and the user interface.
- Developed the app in C# and WPF and integrated AI features through the OpenAI API. The result was a working prototype within the hackathon's time frame.
  Tech: C#, WPF, HTML, CSS, OpenAI API

RestoNation – Software development project (team) | *August 2025 – November 2025*

- A real client needed an application for their business. In the team I was responsible for parts of the backend functionality.
- Built the backend in ASP.NET Core Web API in agile sprints with regular client check-ins.
  Tech: C#, ASP.NET Core Web API, Azure Static Web Apps, Scrum, Git

EDUCATION

Bachelor of Science in Informatics, specialization in Systems Development — *University of Borås* | *August 2022 – June 2025*
