

KHALID HASSAN

Junior Software Engineer & AI Integration

Gothenburg, Sweden · +46 79 357 82 65 · khalidhassan968@gmail.com
Portfolio: khalidhassanportfolio.netlify.app · GitHub: github.com/Khalid1754
LinkedIn: linkedin.com/in/khalid-hassan-0b62222b2

SUMMARY

Junior software engineer focused on backend and AI integration. I build and deploy systems in C# and .NET with React and Azure, develop AI agents and integrate AI into applications, including RAG and multi-agent workflows. As an application technician intern I worked with installation, configuration and operation of business systems. I am looking for roles in full-stack development, application management, integration and implementation in the Gothenburg area.

TECHNICAL SKILLS

Languages & frameworks: C#, .NET / ASP.NET Core, Entity Framework Core, Python, JavaScript, TypeScript, React, Vite, PWA, HTML, CSS
Data, APIs & cloud: SQL Server, Azure SQL, RESTful API design, SignalR, JSON, Microsoft Azure, Azure App Service, Azure Static Web Apps
DevOps & testing: Docker, CI/CD with GitHub Actions, xUnit, Vitest, Testcontainers, Unit testing, TDD, Agile / Scrum
Tools & AI: Git/GitHub, Visual Studio, VS Code, Developer PowerShell, OpenAI API, Groq API, Claude Code, AI agents, RAG

EXPERIENCE

Application Technician (Internship) — *Estrella AB, Gothenburg* | *March 2026 – September 2026*

- Installed and configured new software, including InforMES, and ensured stable operation.
- Supported users with technical issues and handled IT incidents.
- Maintained and updated existing systems to improve performance.

Machine Operator — *Estrella, Gothenburg* | *June 2024 – Present*

- Keep production machines running and resolve issues such as alarms. Operate forklifts to transport raw materials.

Warehouse Worker — *DHL, Gothenburg* | *October 2022 – June 2024*

Vehicle Assembler — *Volvo Cars, Torslanda* | *June 2021 – February 2024*

PROJECTS

POLARIS – Self-learning AI agent | *October 2026 – Present*

- Personal AI agent that learns from what I feed it and from information on the internet. It builds its own knowledge memory and uses RAG to retrieve the right context before it answers.
  Tech: Python, RAG, Docker, CI/CD, Developer PowerShell, Claude Code · github.com/Khalid1754/SelfLearning-Agent

AgentFlow – Multi-agent AI system | *October 2026*

- Built a multi-agent system where 4 AI agents collaborate to produce a report from up to 8 sources per question, with every step streamed live to the browser. Covered by 17 automated tests.
  Tech: C#, .NET 10, EF Core, SQL Server, React, Groq API · github.com/Khalid1754/AgentFlow.API

TrAInr – Training app with an AI coach | *October 2026 – Present*

- Built a full-stack training app with 20 API endpoints and an AI coach running on 3 swappable AI providers, covered by more than 50 automated tests that run before every deployment to Azure.
  Tech: C#, ASP.NET Core, EF Core, React, Docker, Azure · github.com/Khalid1754/TrAInr.API

JobbAgent – AI agent for job searching | *October 2026*

- Saves about 3 hours of manual job searching per week with an AI agent that goes through around 100 job ads per run and ranks them against my resume.
  Tech: C#, .NET 10, Claude API, JobTech API, Azure SQL, React · github.com/Khalid1754/JobbAgent.API

LiFeDenTal – Dental records system | *June 2026 – September 2026*

- Records and booking system for dental clinics that I developed on my own, with RESTful APIs in ASP.NET Core, Azure SQL and React, deployed on Azure Static Web Apps.
  Tech: C#, ASP.NET Core, SignalR, React, Azure SQL · github.com/Khalid1754/LiFeDenTal

EDUCATION

Bachelor of Science in Informatics, specialization in Systems Development — *University of Borås* | *August 2022 – June 2025*
